Userstyles

The best Catppuccin repo ever

Brought to you by @isabelroses

The Rise of Userstyles

The userstyles repo came from humble beginnings, it was originally a suggestion from [@justTOBBI](#).

And now the repo contains a total of 54 userstyles managed by a total of 33 people, and 1 super cool person [@isabelroses](#).

But the repository has not always been this great it originally started off back in february of 2023 as a mere RFC, later being adopted into the main organisation in mid july of the same year. Quite a while to wait for such an amazing repo.

And sadly the repo has not even overtaken the archived youtube userstyle yet.

The Amazing People

This repo exists thanks to the hard work of the people all working together for a greater common goal, the embetterment of society, no the world even.

But all jokes aside, truly thank you all from the bottom of my heart this repo wouldn't be so amazing without you all.

And there is no better way to prove it then to shoutout some amazing people:

Thank You

This project would not be where it is today without the community. It's incredibly wholesome seeing so many people join and care about a few hex codes ;)

Here's to a great 2024!
